

Verified Gas Station Lead Database – Houston, TX

This project presents a curated and highly accurate **B2B Lead Generation** dataset focusing on gas station businesses located in Houston, Texas, USA. As an experienced Excel Expert and Lead Generation Specialist, I have meticulously compiled this list to facilitate targeted business outreach and market analysis.

Key Features:

Targeted Data: Includes verified business names and precise physical addresses for key locations across Houston.

Data Integrity: This database is structured for efficiency, demonstrating professional-grade Excel operations and data skills.

Privacy-First Approach: Sensitive contact information (phone numbers and direct emails) has been intentionally redacted to ensure data privacy compliance while showcasing the depth and structure of the available lead pool.

Use Case:

This dataset is an ideal resource for businesses seeking to offer services (such as consultancy, software solutions, or supply chain support) to the fuel retail sector in the Houston area.

Data Compliance:

Due to international data protection regulations, sensitive contact details have been redacted to ensure privacy for all parties involved, maintaining a comfortable and secure environment for both the data subjects and potential users.
